COLORADO 2.7 L

WING[™]
FUEL SYSTEMS
With **Westport**[™] Technology

The 1st Natural Gas System for GM Turbo Engine 2.7 L

Still, and always, the most reliable natural gas solutions for fleets

Wing Fuel System[™] provides fleets with proven technology from a company that understands green fleets—because we build, operate, and maintain our own. We have engineered, serviced, and installed the most reliable compressed natural gas (CNG) and bi-fuel engines for fleet vehicles for over ten years.

We bought the truck, then built the truck

That's right. Wing Fuel Systems[™] invested in a Colorado and engineered a natural gas upfit specifically for the 2.7 L turbo engine. If you rely on the renowned efficiency of the Colorado 2.7 L, now you can power your truck with environmentally friendly compressed natural gas (CNG)

Engineered for performance

- » Available for any Colorado 2.7 L turbo truck
- » Reliable 237 HP 310 HP
