SILVERADO 2500 HD

WING[™]
FUEL SYSTEMS
With **Westport**[™] Technology

The 1st Natural Gas System for GM Silverado 6.6 L

Still, and always, the most reliable natural gas solutions for fleets

Wing Fuel Systems[™] provides fleets with proven technology from a company that understands green fleets—because we build, operate, and maintain our own. For over ten years, we have engineered, serviced, and installed the most reliable compressed natural gas (CNG) and bi-fuel engines for fleet vehicles.

We bought the truck, then built the system

That's right. Wing Fuel Systems[™] invested in a Silverado 2500 and engineered a natural gas upfit specifically for the 6.6L direct injection engine. If you rely on the Silverado HD's renowned muscle, you can now power your truck with environmentally friendly compressed natural gas (CNG) or super-clean renewable natural gas (RNG).

Engineered for performance

- » Available for any Silverado 2500 truck with the 6.6 L direct injection engine
- » Reliable strength with 401 horsepower and 460 lb. torque
- » Tows up to 14,500 pounds
- » Bi-fuel, CNG/RNG, Propane or Gasoline
- » 23 gasoline gallon equivalent (GGE) in-bed tank configuration
- » Nationwide network of trained service technicians

Backed by quality and service

- » FMVSS—compliant
- » OEM—quality engineering and design
- » EPA certified
- » Wing Fuel System warranty
- » Nationwide network of trained service technicians
